Sustainability of community protocols processes

Long term support

Support for BCPs

Development

- Facilitation, or training of facilitators

- Information and training: ABS, rights / legal frameworks

- Data collection methods

- Drafting, translation

- Financial and logistical support

Support for BCPs

Implementation

- Support for dialogue with users and ABS contract negotiations

- Dissemination – incl. through CHMs

- Processes for extension (including further communities) or revision

Broader support

- Research, knowledge generation

- Capacity development of key actors (government, private sector, civil society, research, community–based organisations)

- Institutional mechanisms to support inclusion of community protocols, and IPLC participation

Questions for sustainability

- How to upscale / mainstream the development and use?

- How to fund future BCP processes?

- How active can/should the involvement of government institutions be?

- What is the role for Users in BCP processes? Incl. trade associations etc. ?
