Presentation

PURPOSE OF THIS DOCUMENT

This document represents the minutes taken during a public meeting convened as part of the Environmental and Social Impact Assessment (ESIA) for the proposed Lokichar to Lamu Crude Oil Pipeline (LLCOP) project in Kenya. The document presents a summary of the issues, concerns, questions, and suggestions raised by the stakeholders at the meeting. The meeting was held on Friday, 9 November 2018 at the Rangelands Hotel, Isiolo, Isiolo County.

The objective of the meeting was to provide stakeholders with more information about the proposed LLCOP project and associated mitigation measures. The meeting also provided stakeholders with an opportunity to contribute comments, suggestions and raise issues of concern. Issues and questions raised during the meeting were captured in the Comment and Response Report. This report will form part of the final ESIA report to be submitted to the relevant authority for a decision.

Your comments are important!

Stakeholders who attended the meeting are invited to review the draft minutes and ensure that the questions, concerns and comments have been captured correctly. Please send any comments and changes that you would like to make within 14 days of receipt to the Public Participation Office.

Address for Comments:

Mr James Kambo

Nairobi, Kenya

1.0 WELCOME AND INTRODUCTION

The meeting was brought to order by Mr James Kambo at 09h40, who welcomed and thanked the guests for attending the meeting. A member of the meeting opened with prayer. Mr Kambo briefed the attendees on the scoping phase which was conducted in June 2018 and stated that the scoping report together with the Terms of Reference (ToR) were submitted to the National Environmental Management Authority (NEMA), and the ToR was subsequently approved. He stated that the purpose of the meeting was to inform the county government officials and representatives about the stakeholders engagement process that will be taking place in the county, where they will be engaging with the local communities to obtain an understanding of the social structure and livelihoods of the people of Isiolo county who will be affected by the project.

2.0 ATTENDEES

Mr James Kambo asked the guests to introduce themselves.

124 attendees signed the attendance register. The list of attendees who signed the register and participated in the proceedings is attached in APPENDIX A.

3.0 AGENDA

The following agenda was presented to, and accepted by the participants:

- 1) Purpose of meeting
- 2) Project team
- 3) Project progress
- 4) Consultation process
- 5) Community *barazas* (meetings)
- 6) Community consultation approach
- 7) Social baseline
- 8) ESIA ongoing biodiversity work
- 9) Stakeholder engagement focus
- 10) Discussions
- 11) Way forward
- 12) Closure

4.0 PROJECT TEAM

Mr James Kambo introduced the project teams and explained the role each team plays in the LLCOP project as follows:

- The government of Kenya – sets the strategy;
- LAPSSET Corridor Development Authority (LCDA) – the authority responsible for the development of the LAPSSET corridor;
- Pipeline Project Management Team (PPMT) – the partnership between government (Ministry of Mining and Petroleum – MoMP) and oil companies to develop the pipeline project; and

- Golder and ESF Consultants – the independent consultants, appointed to undertake the ESIA.

5.0 PURPOSE OF THE MEETING

Mr James Kambo explained the purpose of the meeting as follows:

- Present progress on the planning activities of the LLCOP Pipeline project and delivery teams.
- Provide an update of the ESIA scoping phase findings, issues, comments and responses regarding the proposed project and associated approach.
- Discuss the proposed community stakeholder consultation approach.
- Discussion the social baseline development process.
- Receive any comments on the above findings and proposed approach to community engagements.
- Indicate how stakeholders can participate in the future.

6.0 PRESENTATIONS

A PowerPoint presentation (APPENDIX B) was shown to the attendees; it detailed the project components and provided information on the current progress. The ESIA project process which included the stakeholder engagement, the summary of the scoping consultation, identification of issues, the ESIA scoping findings and the social baseline was explained. The front-end engineering and design and geotechnical survey also presented.

7.0 PROJECT BACKGROUND

An overview and background of the proposed project were presented to attendees. All development projects are subject to an ESIA process in terms of the Environment Management and Coordination Act (2015). This is the first permitting study undertaken for the proposed LLCOP project. Several related studies have been undertaken and include a Strategic Environmental Assessment for the LAPSET corridor project and an ESIA study for the Kenya Upstream Oil Development project.

Golder Associates, in partnership with ESF Consultants, Kenya, have been appointed to undertake the ESIA study.

8.0 PROJECT DESCRIPTION

8.1 Overview

The LLCOP project is a development initiative under a joint partnership between the Kenya Government and the consortium consisting of Tullow Oil Kenya B.V., Africa Oil Turkana Ltd and Total Oil (formally Maersk Oil). The proposed LLCOP project is an onshore pipeline that will provide transportation of crude oil from the production fields in South Lokichar to the marine export facility at the Port of Lamu. There it will be stored and onward exported to international markets. The project will link the upstream oil fields (being permitted separately) with international markets.

8.2 Route

The LLCOP project will commence at a flange point in Turkana County, south-east of the Lokichar oil fields, and end at the Port of Lamu. The LLCOP route is within the LAPSET corridor and will cut across Turkana, Samburu, Isiolo, Meru, Garissa and Lamu counties. The crude oil pipeline will be approximately 820 kilometres long. Areas of land where the proposed pipeline will pass will be acquired by the government and leased to the project.

8.3 Technical Aspects

The proposed project will be executed in a phased manner. The construction time will be approximately two to three years.

The construction of the pipeline will entail excavation of a trench, two metre in depth, along the proposed pipeline route. A conventional trench and backfill construction methodology will be followed. The pipeline will be buried throughout its length with a minimum of one metre of soil cover. The pipe itself will be 18 or 20 inches in diameter. The proposed pipeline will need a 30 metre width for construction and a six metre width for operations. Due to the heavy and waxy consistency of the crude oil, the pipeline will be heated and insulated to keep the crude oil at the optimum viscosity for pumping. The heating will be done through a longline trace system.

There will be approximately 16 intermediate above ground installations (either co-located or standalone), which include pump stations, pressure reduction stations, and electrical generators.

A marine terminal will be constructed at the Port of Lamu. The terminal will comprise storage facilities (1.5 million barrels capacity), a loading line and a marine platform with breasting and mooring structures. The Lamu terminal options under evaluation are an onshore storage and offloading jetty, or a floating storage and offloading vessel. The onward exportation of the crude oil to international markets will take place by ship.

9.0 ESIA PROCESS

This ESIA is being undertaken to acquire the necessary permits to implement the proposed project. The Environmental Management and Coordination Act of 2015 provides detailed guidelines on conducting Environmental Impact Assessments (EIAs) in Kenya. The Act states that all new projects that are likely to affect the environment in any way must undertake an ESIA, and the ESIA report should then be submitted to NEMA for review and approval.

The objective of this ESIA study is to investigate and identify the positive and negative impacts of the pipeline construction and operations. The study will then generate feasible mitigation measures for adverse impacts through an Environmental and Social Management Plan. These studies and recommendations will be done through field investigations, document review, professional analysis, and stakeholder engagements.

The ESIA process entails the following elements:

Scoping Study – An initial field and baseline data reviews as well as early stakeholder engagement to define the scope of the ESIA.

Terms of Reference (ToR) – During this phase, the framework and proposed methodology for the assessment of environmental and social impacts are developed. The ToR phase includes a presentation of the project, proposed ESIA update process and the public consultation process.

Environmental Impact Study (EIS) – This phase entails an impact assessment and will address the issues raised during the ToR phase. A Draft EIS report will be developed and presented to the public for review and discussion. The EIS is then finalised and submitted to NEMA for approval (the decision-making phase).

The ESIA permitting study should be completed by March 2019.

10.0 CONSULTATION PROCESS

The stakeholder engagement process is a requirement of the Kenya Environmental Impact Assessment guidelines and is being undertaken to provide the opportunity for communities, potentially affected and interested people to participate by raising issues, concerns, asking questions and contributing local knowledge.

Stakeholder participation in the process will help to identify and address their concerns early in the project design phase. Stakeholder contributions collected during this process will be recorded and made publicly available in a Comment and Response Report for people to verify that their contributions have been recorded correctly. Special efforts will be made to engage with potentially directly affected people, including women, the youth, as well as local, regional, and national educational and religious organisations, research institutions, non-governmental organisations, and other key organisations. Public meetings and workshops will be held to record comments and suggestions from the public.

This ESIA process commenced in March 2018 and will be completed in March 2019. Availability of reports, times, and location of public meetings will be advertised in the local media and via site notices. The final EIS update will be made available in public places, for review.

Stakeholders will be informed throughout the stakeholder engagement process of this ESIA. Any queries and concerns can be raised at any time through the contacts provided.

11.0 IDENTIFICATION OF ISSUES

All questions, issues, comments and associated responses raised during the discussion session are captured in Table 1.

Date of meeting: 9 November 2018

Venue: Rangelands Hotel, Isiolo, Isiolo County

Table 1: Identified issues, questions, comments and responses

	Meeting	Issue/Question/Comments	Commentator	Response
1	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	LAPSSET is a challenge and we do not have clear information about the related projects and routes. The county assembly is not well coordinated and this will create issues, in particular issues about land. As the county leadership we must have factual information about the projects. The communities are apprehensive about these projects and it is our mandate to clarify this information to relay to people. We accept the projects but we need to remove politics from these discussions despite the conflict between the Isiolo and Meru counties. We want a camp station to be set up specifically for the Isiolo County just like the other counties where the pipeline passes.	Hussein Halake Isiolo County Assembly Speaker	The camp locations indicated on the map are not confirmed, they are proposed locations, and since some were already existing stations, we saw the need to use these to prevent further impact on the environment. We will, however, consider your request.
2	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	Global Positioning System (GPS) readings have been done for 12 counties, from Lamu to Northern Uganda, and Southern Sudan. However, those areas are not important currently; the area of focus is the 820 km pipeline route. It is not certain whether we should review the entire area, because we are not as much interested in the land aspect or the beacons, as in the impact of the pipeline on the plants we depend on. A tree known as Huur	Abdi Somo National Treasurer, Gum and Resins Association of Kenya	Your concerns are noted and captured. The purpose of this meeting is to understand these issues and to find suitable solutions. Once we know where these trees are located we can consider revising the route to avoid these areas. If this is not possible, adequate compensation will be paid.

	Meeting	Issue/Question/Comments	Commentator	Response
		{ <i>Boswellia Neglecta</i> }, which is found in the Isiolo County around the Garba Tulla area, currently sells for KSh 900/kg. One tree produces between 200 and 250 grams of resin for a period of nine months during the wet season. During the dry season it does not produce any resin. The 180-page report is available for your reference. Therefore, we would like to know how much compensation will be paid for the damaged or destroyed trees and the livelihood loss as a result.		
3	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	The route of the pipeline is not clear from the map. Have you identified mosques along the route? As a Muslim community, we do not allow these (mosques) to be decommissioned. If, however, you have identified mosques or other such institutions and they have to be demolished, what compensation will we receive?	Salah Jillo, Governance, Risk and Compliance	We have not identified any mosques along the route, but in the event that we do, we will consult further to avoid any impacts.
4	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	In my view this meeting is of no benefit, and I do not believe you can provide solutions to our issues. We can see from the map that Isiolo has been left out and you are only considering the Meru County. Is it because the former chairman of LAPSSSET was from the Meru County?	Omar Jirmo Council of elders	Your comments have been noted. According to law this ESIA study has to be conducted by an independent consultant who does not have a vested interest in the project. Therefore, it is important that you raise all the concerns and issues that you think may need to be considered. The issues are then captured in the EIS report, which is submitted to NEMA for

	Meeting	Issue/Question/Comments	Commentator	Response
		You keep saying other people will respond to our queries. Why are these experts not here today to provide this information?		consideration as to whether or not the project may proceed. If the project is approved, it must be implemented according to certain standards. Simultaneously, a plan must be developed that is sustainable and has minimal impact on the environment and society.
5	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	Please provide us with a more detailed map and share the minutes of the previous meeting together with the scoping report and the Terms of Reference that was approved by NEMA.	Daniel Mwirigi Land Justice	We will share the report; please provide us with your email address.
6	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	Compensation will not offset loss or damage to the environment; that will be permanent and have a significant impact on the environment. The county government must bring in experts from the environment department to work with the project consultants to ensure the final report is correct and meaningful and our sensitive environment protected. The project is good and the steps you are taking to conduct the ESIA study are also good, but we would like the county government to represent us.	Ahmed Set Retired Administrator/interfaith Institution	Thank you for the comments. We would be happy to work with the county government.
7	9 November 2018	It is good that you are including the residents of the Isiolo County in the project. Many potentially affected people do not have title deeds to their property and compensation may be	Bishop S Kalunyu Chairman, National Council of Churches of Kenya (NCCK)	The comments have been captured and the issues raised will be considered.

	Meeting	Issue/Question/Comments	Commentator	Response
	Isiolo County Meeting Rangelands Hotel Conference Hall	<p>given to the wrong people. We need assistance to obtain those title deeds, because most land is communally owned.</p> <p>We will support the project, as long as you address the environmental aspects and ensure that the environment is protected.</p>		
8	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	<p>The same issues that are being raised here were raised in a previous meeting that we had with the LAPSSET team near Nomad Place. We were told that another meeting would be held during which these concerns will be addressed. Today it appears that ESF, as part of LAPSSET, cannot provide the answers; which is concerning. We have expectations and would like answers despite our supporting these projects.</p> <p>One of our community members (Abdullatif) works at LAPSSET and we asked him to request a meeting in Isiolo. However, the meeting was held in Meru and the project members who were sent to Isiolo did not engage with religious leaders or elders.</p> <p>Therefore, Mr Kambo, when you report back to your office, please advise them that we want more information and assurances because the information you presented does not address our issues. Listen more to the community and provide sufficient time</p>	Mike Delano Wangila Representative for the County Commissioner.	<p>Thank you for the comments received. Please be advised that the LAPSSET team deals with a different component of the project and the follow-up meetings, during which answers will be provided to the questions raised, will take place in the future. This consultation process deals with the LLCOP project. Another round of consultation will take place to provide feedback about the issues that were raised at this meeting.</p> <p>Thank you for your advice. We will strive to listen better and provide sufficient time for discussion.</p>

	Meeting	Issue/Question/Comments	Commentator	Response
		for review and discussions, rather than having us respond the same day.		
9	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	<p>Please do not hold the next meeting on a Friday since we are Muslim and go to mosque on a Friday.</p> <p>I do not see the Tana River on the map, but at the Garissa meeting it was indicated.</p> <p>The government must not take advantage of our communal land because we are pastoralists.</p> <p>How many trees will be destroyed by the construction of the pipeline? We are pastoralists and depend on these trees for our livestock and the grass and the land, which is not adjudicated.¹ You must consider these issues because destruction of the environment will cause conflict.</p> <p>How will we benefit from these projects if people from our county do not have title deeds?</p> <p>How are you going to compensate the affected people?</p> <p>Our land is communal. We have hunters and gatherers who cannot account for their resources; how will they be assisted and compensated?</p>	Abdullahi Dhima Borana council of elders	<p>Thank you for the comments; they have been captured. We will not hold any future meetings on a Friday.</p> <p>The LAPSSET corridor does not go through Tana River County and our team has never indicated this in our engagements.</p> <p>On matters to do with title deeds and compensation the National Land Commission and LAPSSET will address all land issues during their separate engagement process.</p>

¹ The process through which existing rights in a particular parcel of land are finally and authoritatively ascertained. In Kenya this process has been critical in the conversion of land held under customary tenure into individual holdings.

	Meeting	Issue/Question/Comments	Commentator	Response
10	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	<p>We are not happy with these LAPSSET projects and the issues they raise since it appears that our concerns are not being taken seriously.</p> <p>What compensation plans or alternative areas are in place for pastoralists?</p> <p>The Background Information Document (BID) stated that the meeting would be announced on radio and in other public media; why was this meeting not advertised? I believe many more people would have attended this meeting and contributed significantly particularly those who are environmental experts. Please ensure that all local radio stations are used to announce the next meeting.</p>	Mumina Konso Jillo Nominated Member County Assembly /County Government Gender Representative	<p>Thank you for your comments, they will be taken into consideration.</p> <p>On pastoralist compensation, we will be looking at livelihood restoration in which during social baseline engagements we will be meeting with pastoral groups in order to be able to understand their social context so that they can be adequately compensated.</p> <p>For future engagements we will most definitely make use of local radio stations and any communication channel that will lead to having more participants in our meetings.</p>
11	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	<p>The public participation that was done should have involved all members of the community and it should have been announced on the radio and advertised in the newspaper to encourage attendance. Therefore, I recommend that for future meetings the project team:</p> <p>make use of the available communication channels</p> <p>create committees in the affected communities to help with decision making and report writing to ensure the report is acceptable</p>	Ibrahim Wako Isiolo Peace Link	Your comments have been noted. Thank you.

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>have a feedback mechanism to ensure that the public can contribute their views before the report is finalised</p> <p>prepare an environmental audit report</p> <p>provide employment opportunities similar to that done in the Turkana County where 70% of the employment opportunities are awarded to local people, 30% to foreigners and 10% to experts</p> <p>partner with county government since this is very important</p> <p>prepare a resettlement action plan (RAP) to resettle the affected people because many of them do not have title deeds and they want to know what compensation will be paid</p> <p>introduce a corporate social responsibility programme, similar to the one in Lamu where 1,000 scholarships were awarded to the youth. We also need polytechnics to be upgraded to accommodate those who are unable to attend university</p> <p>please ensure the project engagement is done professionally and carefully. There are many people in the community who need to be consulted.</p>		
12	9 November 2018	The map indicates that there will be a camp station in Kula Mawe; this is a good location.	Mohamed Godana Golicha	Thank you for the comments, they have been captured.

	Meeting	Issue/Question/Comments	Commentator	Response
	Isiolo County Meeting Rangelands Hotel Conference Hall	<p>The land in Isiolo is communal, has not been legalised and registration has not been done despite the government's instruction to do so. We would like to have the process of land settlement moved from the national government to the county government.</p> <p>We are concerned that the compensation will be compromised because our land is communal, and we do not know how the process will be dealt with. I would like to be present when the National Land Commission engage with the community.</p>		
13	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	<p>As the leaders of Isiolo, we have not yet accepted the LAPSSET projects; the community comprises approximately 1,000 people.</p> <p>We would like to engage with the entire LAPSSET team and not only the pipeline project team.</p> <p>Your public participation has not reached the constitutional threshold.</p> <p>No person is allowed to interfere with community land without the owners' consent and this is supported by the Constitution.</p> <p>The LAPSSET projects seem reasonable but the effects would be significant.</p>	Hassan Wako Wario Council of Elders	All the comments have been captured, thank you.

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>To succeed, the pipeline project team must provide detailed information to the community and engage effectively with the stakeholders.</p> <p>The success of any project is often determined by the following:</p> <ul style="list-style-type: none"> public participation acceptance by the community/people support from the community/people satisfactory benefits arising from the project cooperation between the project team and communities affected transparency and openness. 		
14	<p>9 November 2018</p> <p>Isiolo County Meeting Rangelands Hotel Conference Hall</p>	<p>What measures have been put in place to protect our conservancies and the wildlife in our county, particularly around the Kalama Community Game Reserve and Sarova Community Game Reserve areas?</p> <p>What measures have been put in place to consider the pastoralists who will be affected by the pipeline project?</p> <p>Please hold the next meeting for the Isiolo community in this county.</p>	<p>Omar Godana Dida</p> <p>Council of Elders, Northern Rangelands Trust</p>	<p>Recommendations and mitigation measures will be proposed and presented for comment. Stakeholders are welcome to recommend and provide other mitigation measures that they think may work better.</p> <p>Comment on venue location is taken note of.</p> <p>The pipeline will not pass through any game reserve; these areas will be avoided. The pipeline will only pass through the</p>

	Meeting	Issue/Question/Comments	Commentator	Response
				Nyambene North Game Reserve, which is in the Meru County.
15	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	<p>Meetings must be arranged in advance to give the community time to prepare.</p> <p>Please involve the Isiolo county government as it appears that they are excluded from project planning. Please also ensure communities and elders are engaged more effectively as they have extensive local knowledge.</p> <p>LAPSSET and the National Land Commission have planned several major projects in our county, but the information is not provided collectively, resulting in confusion.</p> <p>We have not been consulted and our concerns will not be addressed.</p> <p>Please provide us with the species data collected along the route of the pipeline. Please also highlight seasonal changes in species movement along the route as this will inform the construction schedule.</p> <p>We would like to see the exact locations of the permanent over ground stations and access road infrastructure since this information has not been forthcoming.</p>	Phillip Lenaiyasa County Chief Officer, Tourism & Wildlife	<p>We have engaged with the county government and the governor's office made calls to the county commissioner. The speaker relays the information about the meetings to the relevant departments. However, we will continue engaging with and including the county government in this project so that we get the information required.</p>

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>An invasive species management fund should be established. Often the long-term management of these invasive species is left to government departments who are over committed and do not have the finance to implement such programmes.</p> <p>Where will the water needed for construction and mitigation measures (e.g. water truck spraying to reduce dust pollution) be sourced from, because water is scarce in our county.</p> <p>An environmental monitoring and emergency response fund must be implemented for the construction phase so that Kenya Wildlife Service and partners have the finance to respond.</p> <p>The benefits that will arise from this project are not clear; communication must be improved.</p>		
16	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	We would like a day to be set aside next week, where we can discuss tourism matters.	Peter Mbote Kenya Wildlife Service	We will seek to make arrangements.
17	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	There is a conservancy in Botu, and we want to protect our wildlife and animals. This area must be treated with the same care as the Nyambene Conservancy.	Salad Michael Alonya Personal Assistant to Member of County Assembly Ngaremara.	Thank you for your comments.

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>The project must provide tangible benefits to the community. If this is not possible, we would like the route to be changed to pass through our houses instead of the forest and land because then we can be sure that we will receive compensation. It will be difficult to assess the compensation value of the loss of trees and resources that we depend on.</p>		
18	<p>9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall</p>	<p>The LAPSSET projects have not considered the people of Isiolo from the onset. It has created conflicts due to lack of proper public consultation.</p> <p>You arranged the meeting in the Meru County instead of Isiolo, knowing that most of the residents in Isiolo cannot afford transport to come to this meeting.</p> <p>Please advise Titus Ibui that conflict has already begun because outsiders are already moving into Isiolo to benefit from the compensation that may arise from these projects.</p> <p>What benefits will these LAPSSET projects bring to the people of Isiolo?</p> <p>Conflict is not good and does not benefit anyone. It is important that we all resolve our differences. If LAPSSET is going to cause more conflict amongst the people with little benefit to the community, then</p>	<p>Gabriel Ilikwel Chairperson, Peace and Cohesion</p>	<p>Your concerns have been noted.</p>

	Meeting	Issue/Question/Comments	Commentator	Response
		let us work to remove these projects from our county.		
19	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	It is important to meet with the community in their own area to understand the way of life and livelihoods of the people that will be directly affected by the project. The project leaders should also be at the meetings to address the community instead of writing reports for them to read.	Nicholas Asuran Turkana council of elders	Your comment has been noted.
20	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	LAPSSET can be either beneficial or disastrous, particularly when it involves land matters as these lands already have owners. When the Isiolo International Airport was being constructed some residents were displaced and they never received any compensation. Therefore, it is not difficult to understand why our people are so bitter when they hear of LAPSSET projects. It is important that our people are educated about the benefits LAPSSET will bring, and how it will help them. Representatives or a committee should be formed at community level to address the issues that will be raised and to inform the community about the projects.	George Karithi Resident	Thank you for your comments and suggestion. These have been captured.

	Meeting	Issue/Question/Comments	Commentator	Response
21	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	<p>All issues that have been raised and expressed here today are related to conflicts. Therefore, this project should strengthen the Alternative Justice System (AJS) to address all these issues because not all cases are solved in the court systems.</p> <p>We would like 30% of the project to be given to the community in the form of corporate social responsibility programmes. The residents of Isiolo did not benefit from the new airport. Please consider this aspect.</p> <p>Please consider ways to relay information about these projects, for example, through the use of our local radio stations so that our communities can also make decisions pertaining to these projects.</p> <p>An office should be established in Isiolo because most of the LAPSSET projects are set to be developed here. An office will help to address our issues.</p>	Abdullahi Haji Gojobe Borana Council of Elders	Thank you for your comments.
22	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	LAPSSET is good and I know it will bring benefits to the community. Job opportunities should be given to the youth in that area.	Moses Kithinji Local Leader	Your comment has been noted.

	Meeting	Issue/Question/Comments	Commentator	Response
23	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	I would like to know what mitigation measures have been put in place to address the negative impacts of these projects, e.g. human immuno-deficiency virus and acquired immuno-deficiency syndrome (HIV/AIDS), human trafficking, tourism and agriculture.	Silas Eudan Local Initiatives for Development Actions.	Your comment has been noted. We will be addressing highlighted issues/Impacts in our report which we will share with the stakeholders.
24	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	We want to be given facts and information about these LAPSSET projects. We want the exact routes to be indicated so that we can identify the resources that should be impacted. How will these projects benefit us in terms of the business and employment opportunities for our youth? We want information to be disseminated to the people at the community level. How will these projects benefit the poor living along the pipeline route?	Aletia Chegem Turkana Council of Elders	The person who booked the venue was not aware it was in Meru County. We have noted your comment and the next meeting will be held in Isiolo town. This meeting is the first meeting to be held in Isiolo. We will engage with all the towns and communities along the pipeline route to understand their social context and capture the issues that they raise and need to be addressed.
25	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	Please indicate the exact areas the pipeline and the railway line will pass. As leaders from Ngaremara we were not aware of the meeting today nor the one that will take place tomorrow in our area. How did you advertise this meeting and how are we going to work like this?	Ekua Teru Member of County Assembly , Ngaremara	Thank you for your comments. We will consider the issues you have raised, and propose mitigation measures to prevent interference with the migration corridors. The invitation letters are sent according to the public participation guidelines. They were sent to the county governor and the speaker who disseminate the information

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>Clear communication channels about these meetings must be provided so that we and our community members can prepare adequately.</p> <p>It is important that there is an emphasis on transparency in the information provided to the community about this project.</p> <p>Please clearly state the benefits that will accrue from this project.</p> <p>What benefits will the community conservancies and game reserves receive in terms of the wildlife, and the domesticated animals?</p> <p>How will you establish a relationship with the communities so that they can assist and be part of the project?</p>		<p>to the relevant department. They then advise the county commissioner who liaise with the specific location chiefs who then inform the elders and community members about the meetings. Invitations were also sent out civil society groups operating in the region.</p>
26	<p>9 November 2018</p> <p>Isiolo County Meeting Rangelands Hotel Conference Hall</p>	<p>I have been closely following your movements and have been in contact with Mr Hajir for progress on this project. We would like to know the benefits and impacts of this project.</p> <p>There is a land conflict between the residents of Isiolo and Meru. It is important that people living in those areas have title deeds before these LAPSSET projects commence in order for them to be able to receive compensation. We do not want a repeat of what happened with the airport project because, to</p>	<p>Lokitela Augustine Youth Representative</p>	<p>Thank you for the comments.</p>

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>date, some of the displaced residents have still not been compensated.</p> <p>Many questions have been raised in this meeting regarding the location of the pipeline especially around Archer's Post. Please note to note that there are market centres within areas of the proposed pipeline routes and these must be marked on the map.</p> <p>Please work closely with the residents and county government to get the correct information, and the issues raised must be addressed adequately.</p> <p>The youth in Isiolo are educated and many are graduates, with the necessary skills to work on this project.</p> <p>Please provide clear information to the county government on the benefits that will accrue from the project.</p>		
27	<p>9 November 2018</p> <p>Isiolo County Meeting Rangelands Hotel Conference Hall</p>	<p>The county and national governments and the National Land Commission are working together to address land rights especially community land. We have already started in Ngaremara where we have captured the information of approximately 200 people who are settled there. The work in Garba Tulla is ongoing as in other areas; all of which is for compensation purposes. Please provide us with your</p>	<p>Eric Murithi County Government Surveyor</p>	<p>Thank for those comments. Please assist us with locating the settlements on the map. I also suggest that you and your department come out to address the residents of Isiolo on what you're doing because the land issue is important, and they need to know what is happening and</p>

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>maps in order for us to identify the additional settlements.</p> <p>The Community Land Rights Act has been approved but the regulations are still to be publicised. According to the Act, if a project impacts on communal land compensation is paid to the county government after assessment by land valuers.</p>		<p>what has been undertaken to address this matter.</p>
28	<p>9 November 2018</p> <p>Isiolo County Meeting Rangelands Hotel Conference Hall</p>	<p>Where are we exactly with ESIA? When was the ToR approved?</p> <p>Are the community consultations completed? Or are there going to be other new community consultations after those that have already taken place?</p> <p>Previous EIA reports have been bulky e.g. the coal power plant in Lamu had around 200,000 pages which forced the county government to appoint a consultancy to read it out to the community. Therefore, please consider ways in which this report information can easily be relayed to the communities and easily understandable.</p> <p>From the previous meeting that was held in Nairobi in June, we had requested copies of the shapefile maps for the proposed pipeline route but that hasn't been forthcoming despite several requests. Many people have said it is difficult to comment/contribute</p>	<p>Sarah Chiles Grévy's Zebra Trust and Ewaso Lions Project</p>	<p>We have teams looking specifically at mitigation measures for wildlife, livestock the human/social aspect and threatened species and birds. We are happy to provide such information and will request these teams visit your offices so that you can work together to better plan for the project.</p> <p>The FEED study is ongoing and has not been completed. They will work through until December and be in Isiolo on 14 November. We will forward these queries to them.</p> <p>There was a mix up in the communication for the meeting today which was out of our control, but we tried to gather as many people as possible to attend this meeting. It won't happen again, I apologise.</p>

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>meaningfully in these meetings because they don't know the exact routing.</p> <p>In terms of geotechnical survey, I have heard that there is currently clearing of land in Lerata and excavation which appears to be the digging of the trial pits. What environmental permission do you have for that or does that process fall under the ToR's approval? Please clarify</p> <p>We understand the front end engineering design (FEED) report is completed. We would like to know how our inputs from the ESIA report will be incorporated into the FEED report in terms of informing on the micro re-routing the pipeline route. Please provide clarification.</p> <p>The last-minute communication of venue and the abrupt change wasn't communicated widely; it caused many challenges and agitation which need not happen again.</p> <p>The manner in which you advertise public participation meetings through the county government and chiefs is not enough because some of the stakeholders who might have wanted to come and contribute meaningfully have been left out. Please improve communication.</p>		<p>The request about the document size has been captured and will be forwarded to the relevant team. It makes sense to have a document that is well understood and integrated by community members. However, trying to make the document smaller is a challenge because it could mean omitting some information.</p> <p>Community consultation has not been completed. The teams are set to start tomorrow in Isiolo County. We will go back to those communities once mitigation measures have been recommended, to see whether they will be feasible, and if the communities are satisfied or if they wish to put forward other measures.</p> <p>The plans and details that you ask about are supposed to be a product of the study and therefore will be available at a later stage when the teams complete their investigations.</p>

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>What measures have you put in place in terms of long-term mitigation if the infrastructure is on the ground forever but the benefits only extend for 25 years?</p> <p>Have you thought of developing a climate change adaptation development fund? What does it look like for northern Kenyan regions? Have you engaged with the county governments on that since we know Samburu and Isiolo County climate change is at the top of their agenda due to the subscriptions and commitment to the sustainable development goals, which must be covered in the ESIA report.</p> <p>We know that LAPSSET is made up of various different projects and that the pipeline project is a small part of it which benefits because of easier access. How will the oil pipeline consortium working with LAPSSET address the cumulative impacts once all these projects have been developed?</p> <p>What does the invasive species management capacities plan look like? Where will the financing/fund for the management of these species come from? Who will be responsible for managing the invasive species? These needs to be clearly addressed.</p> <p>(Note: She presented two maps, one for Grévy's zebra and the other for lions, all showing the impacts</p>		

	Meeting	Issue/Question/Comments	Commentator	Response
		<p>they were looking at with regards to how they foresee the pipeline project might interfere with the animal habitats, wildlife movement and breeding sites.)</p> <p>It is oblivious and wrong to say a buried pipeline will have zero impacts on wildlife movement because issues such as noise, above-ground installations, edge effects, habitat transformation as a result of invasive species, pollution of oil leakages on the soil and environment, open pits that result in mortality will arise during the construction and operational period. Please, therefore, take into account the complex and dynamic behaviour of these animals.</p>		
29	<p>9 November 2018</p> <p>Isiolo County Meeting Rangelands Hotel Conference Hall</p>	<p>Please work and liaise with the county government and the civic education department who will assist you adequately.</p> <p>I don't know whether you are the right person to address this question to, but can you give us an update on the proposed Mega Dam and if you will be the team conducting the EIA?</p>	<p>Ibrahim Kabelle Merti Integrated Development Programme (MIDP)</p>	<p>No, we are not the team who will conduct the EIA and I can't give you any information on that because I am not responsible for that project or aware of its details.</p>
30	<p>9 November 2018*</p> <p>Isiolo County Meeting Rangelands Hotel Conference Hall</p>	<p>Is there any chance that the route will change?</p> <p>How many above ground installations will be in Isiolo County?</p>	<p>Eric Murithi County Government Surveyor</p>	<p>The current studies will inform us about that. However, the main objective of carrying out these studies is to minimise impacts and where possible to change the route. For example we have a specialist from Kenya museums to assess the</p>

	Meeting	Issue/Question/Comments	Commentator	Response
				<p>heritage and geological sites along the proposed route so that such areas can be avoided; or for the route to change. It will require much decision making among key stakeholders.</p> <p>AGIs (Above Ground Installations) don't go according to county because we are looking at the terrain and how the oil is going to flow. They are advised by technical details.</p>
31	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	Will security personnel be along the pipeline and in the above ground installations?	Sarah Chiles Grévy's Zebra Trust and Ewaso Lions Project	Yes, for the generators and the rest. We will be working with Israel Security, experts in the Technical Surveillance Sector.
32	9 November 2018 Isiolo County Meeting Rangelands Hotel Conference Hall	How participatory was the geo-mapping process?	Eric Murithi County Government Surveyor	The government ran a satellite which mapped the settlements, buildings and structures along the pipeline route to identify any opportunistic people who move in to the area for compensation. Affected people who have resided on the land for many years will be compensated.
33	9 November 2018	Will the heritage and cultural team engage with the community in the same way as this?	Eric Murithi County Government Surveyor	I don't think so because they will be working more with the community elders. I will, however, call to enquire how they are

	Meeting	Issue/Question/Comments	Commentator	Response
	Isiolo County Meeting Rangelands Hotel Conference Hall			planning to engage with stakeholders and will get back to you immediately.

12.0 FUTURE INTENTIONS

Mr James Kambo indicated that the information sourced during this meeting would be captured in formal minutes and in a comments and responses register. He added that several meetings had been arranged for different towns within Isiolo County where the pipeline will pass, for communities to be involved during the process and provide information to the ESIA team in order to promote understanding of their social context. It was also to provide opportunities for the communities to put forward issues and concerns that need to be considered in the project. Mr Kambo stated that the consultation process would begin immediately and run for the next two weeks, and all comments and issues raised would be captured for reporting. The consultation process will continue to engage with stakeholders and communities at county and community level, as needed.

13.0 CLOSURE

All participants were thanked for their attendance, comments and input. The issues would be captured and the meeting minutes distributed in due course. The meeting was closed by Mr James Kambo.

Presentation

The Proposed Lokichar to Lamu Crude Oil Pipeline Project (LLCOP)

STAKEHOLDER CONSULTATION COUNTY LEVEL UPDATE WORKSHOP

GOLDER

October 2018

1

WELCOME AND INTRODUCTION

Welcome

Introductions

LOKICHAR TO LAMU CRUDE OIL PIPELINE PROJECT 2

2

AGENDA

BASELINE STUDY MEETING: LOKICHAR TO LAMU CRUDE OIL PIPELINE PROJECT

1. Purpose of Meeting
2. Project Team
3. Project Progress
4. Summary of Scoping Consultation
5. Community Barazas
6. Community consultation approach
7. Social Baseline
8. ESIA Focus
9. SE Focus
10. Discussions
11. Way forward
12. Closure

LOKICHAR TO LAMU CRUDE OIL PIPELINE PROJECT 3

3

1. PURPOSE OF MEETING

- Present progress on the planning activities for Lokichar to Lamu Crude Oil Pipeline Project and delivery teams.
- Provide an update of ESIA Scoping Phase findings, issues, comments and responses regarding the proposed project and associated approach.
- Discuss the proposed Community Stakeholder Consultation approach.
- Discuss Social Baseline Development process.
- Receive any comments on the above findings and proposed approach to community engagements.
- Indicate how stakeholders can participate in the future.

LOKICHAR TO LAMU CRUDE OIL PIPELINE PROJECT 4

4

2. PROJECT TEAM

2.1 LAPSSET

The lead Government of Kenya organisation and leasor of land to the Pipeline.

2.2 PPMT

The Pipeline Project Management Team – consisting of the Governed of Kenya, Tullow Oil plc, Africa Oil Corporation and Total Oil.

2.3 ESIA CONSULTANT

Golder Associates, an independent ESIA consultant selected by GoK-led tender process. ESF Consultants, a Kenya based environmental management consultant is the in country Kenyan component.

LOKICHAR TO LAMU CRUDE OIL PIPELINE PROJECT 5

5

3. PROJECT PROGRESS

3.1 FRONT END ENGINEERING & DESIGN

- FEED Studies are underway and expected to end in December 2018.
- Draft Construction Report already generated and inputs from ESIA and geotechnical survey to be incorporated.

3.2 GEOTECHNICAL SURVEY

- Topographical survey and installing survey beacons
- Drilling of core soil/rock samples.
- Digging trial pits at appointed locations

3.3 ESIA

- Scoping study completed and submitted to NEMA.
- Terms of Reference Sent to NEMA for approval.
- Baseline (Biophysical) underway.

LOKICHAR TO LAMU CRUDE OIL PIPELINE PROJECT 6

6

GEOTECH ACTIVITIES

7

8

9

INDICATIVE CONSTRUCTION CAMP LOCATIONS

10

LAND ACQUISITION

- Land will be acquired by LAPSSET through the National Lands Commission.
- Land acquired will form the LAPSSET Corridor – 500 m wide
- LAPSSET will lease to pipeline approximately 30m wide corridor during construction and this will reduce to 6m during operations.
- Process to follow the requirements of the Constitution and legislation on land acquisition.
- NLC will soon be implementing the acquisition exercise and their officers will be visiting the areas in the corridor to sensitize the communities.

11

4. SUMMARY OF SCOPING CONSULTATION PROCESS

Date	Meeting/ Type	Total Number Participants
11 June 2018	Parliamentarian Forum - Nairobi	38
12 June 2018	National and NGO Meeting - Nairobi	57
18 June 2018	County Meeting - Isiolo	58
19 June 2018	County Meeting - Meru	45
21 June 2018	County Meeting - Garissa	120
25 June 2018	County Meeting - Lamu	134
27 June 2018	County Meeting - Samburu	93
29 June 2018	County Meeting - Turkana	38
	Total Attendees	583

12

5. COMMUNITY STAKEHOLDER CONSULTATION APPROACH

Community engagement set out under three teams consistent with the scoping phase approach i.e.

- Team 1 Garissa and Lamu –
 - Regional Lead: Duncan Oyaro
 - Garissa Assistants: Sirad Madhowo and Abdijabar HusseinAden
 - Assistant: Mohamed kitele
- Team 2 Isiolo, Meru and Samburu
 - Regional Lead: Hajir Mohamed
 - Meru Assistant: Bernard Murithi; Isiolo Assistant: Jelle AliAdan;
 - Samburu Assistant: Hillary Sisina
- Team 3 Turkana
 - Regional Lead: Michael Kapolon
 - Assistant: Maurice Ikaal

16

COMMUNITY STAKEHOLDER ENGAGEMENT LOCATIONS

17

6. COMMUNITY BARAZAS

Use of poster to help communities understand the project and construction of the pipeline

Communities will be engaged through barazas in available meeting halls or out in open field

18

7. SOCIAL BASELINE

- Social Baseline to be collected through Focused Group Discussions.
- Baseline data to focus on cultural and socio-economic characteristics of people that will be directly affected person particularly vulnerable groups.
- FGD teams to consist of Facilitator and Documenters with a set of translators in-office.
- Groups to be engaged include resource-use groups (farmers, pastoralists, gums and resins, beekeeping etc), women's and youth groups as so forth.
- FGD teams will have guidelines provided that will provide direction on the nature of questions.

19

8. ESIA FOCUS

20

9. STAKEHOLDER ENGAGEMENT FOCUS

- Legal Requirement.
- Opportunity for stakeholders to participate in ESIA process.
- To inform and consult.
- Integrate and consider stakeholder viewpoints in the ESIA.
- All stakeholder contributions recorded and disclosed.
- Identify vulnerable groups, including women, the youth, indigenous peoples and disempowered people.
- Information in public domain.
- Provide feedback on results and information use.

21

10. DISCUSSION

Facilitated by Mr James Kambo.

- Please provide your name and surname.
- Focus on LLCOP.
- Land related issues addressed by NLC – so outside our discussions.
- Complete comments and registration sheet.

22

11. WAY FORWARD

- Event timelines.
- Future consultation.
- Availability of information.
- Record Key issues for each meeting.
- Project deliverables.
- ESIA process continuation.

23

Closure
